The instrument of the "ФЭ-ЗУ" type has three measurement limits: 100, 500, and 2000 mv. The time of damping of the instrument is 0.3 sec. The error at a 100 mv limit does not exceed 1%. The value of the output current for all measurement limits is 5 ma, with a loaded impedance up to 300 ohms. The use of this apparatus in practice has demonstrated its high operational properties.
